TASK3-COCA<https://www.english-corpora.org/coca/>LIST

The screenshot displays the COCA website interface. The top navigation bar includes 'SEARCH', 'FREQUENCY', 'CONTEXT', and 'ACCOUNT'. The 'SEARCH' tab is active, showing a search form with the word 'samsung' entered. Below the search bar, there are links for 'List', 'Chart', 'Word', and 'Browse'. A 'Find matching strings' button and a 'Reset' button are also present. On the right side, there is a 'Download the corpus (and corpus-based frequency data) for offline use' button and a 'NO LICENSE' warning. The main content area on the right provides information about the COCA corpus, including its size (one billion words) and its composition (spoken, fiction, popular magazines, newspapers, academic texts, TV and Movies subtitles, blogs, and other web pages).

CHART display

If you are interested in a set of words or a grammatical construction, then the [LIST](#) option shows the frequency of each matching form (*end up being*, *ended up saying*, etc), while the [CHART](#) option shows the total frequency in each section. (in COCA, the genres and five year blocks). It is also possible to see the frequency of words and phrases by sub-genre and/or year, e.g. [laptop](#), or [fake news](#).

For example, some cases of lexical change over time: [morph](#), [old school](#), [freak out](#), [think outside the box](#), [throw someone under the bus](#), [be likely a](#) [j](#) the.

Some cases of lexical variation between genres: [I guess](#), [, you know](#) ,, [muffled](#), [frowned](#), [validity](#), [correlate](#), [. in particular](#), [a lot of](#), [kind of](#) NOUN, [type of](#) NOUN.

Of course you can also search for grammatical constructions, such as : [and I'm like](#), [get passive](#), [end up V-ing](#), [be passive](#), [appear to V](#), [must + verb](#).

You can find a wealth of information for the top 60,000 words in the corpus. As the following examples with *bread* show, you can see:

- an [overview](#) of all of the information below
- related [topics](#) (words that co-occur *anywhere* on the web page)
- [collocates](#) (automatically grouped by part of speech)
- [clusters](#) (the most frequent 2, 3, and 4 word strings)
- a resortable [Keyword in Context](#) (concordance) display
- [related words](#) (synonyms and WordNet entries), and
- [websites](#) use that word the most (can use these to create Virtual Corpora).

samsung is not one of the top 60,000 words of English, and so it's not possible to see the full range of information that you could for one of these 60,000 words (such as definition, synonyms, or related topics).

But you can still find a lot of information for **samsung** in the corpus. Here are some options:

1. Just choose STRINGS (rather than WORDS) in the search form and try again ([show me how](#)). You will still be able to see the frequency of the word and see it in context (basic concordance lines).
2. You can also see [re-sortable concordance lines](#).
3. You can find the [collocates](#) of the word, although they won't be grouped by part of speech.
4. To find clusters, [just add *](#) before or after the word, e.g. `samsung * *` or `* samsung *`.
5. Feel free to also [browse the word list](#) to see if there are related words.
